NAME
 CURLINFO_SPEED_DOWNLOAD − get download speed

SYNOPSIS
 #include <curl/curl.h>

 CURLcode curl_easy_getinfo(CURL *handle, CURLINFO_SPEED_DOWNLOAD, double *speed);

DESCRIPTION
 Pass a pointer to a double to receive the average download speed that curl measured for the complete download. Measured in bytes/second.

PROTOCOLS
EXAMPLE
 TODO

AVAILABILITY
 Added in 7.4.1

RETURN VALUE
 Returns CURLE_OK if the option is supported, and CURLE_UNKNOWN_OPTION if not.
