NAME

CURLMOPT_CONTENT_LENGTH_PENALTY_SIZE - size threshold for pipelining penalty

SYNOPSIS

#include <curl/curl.h>

CURLMcode curl_multi_setopt(CURLM *handle, CURLMOPT_CONTENT_LENGTH_PENALTY_SIZE, long size);

DESCRIPTION

Pass a long with a **size** in bytes. If a pipelined connection is currently processing a request with a Content-Length larger than this *CURLMOPT_CONTENT_LENGTH_PENALTY_SIZE(3)*, that pipeline will then not be considered for additional requests, even if it is shorter than *CURLMOPT_MAX_PIPE-LINE_LENGTH(3)*.

DEFAULT

The default value is 0, which means that the size penalization is inactive.

PROTOCOLS

HTTP(S)

EXAMPLE

TODO

AVAILABILITY

Added in 7.30.0

RETURN VALUE

Returns CURLM_OK if the option is supported, and CURLM_UNKNOWN_OPTION if not.

SEE ALSO
