NAME
CURLINFO_NUM_CONNECTS − get number of created connections

SYNOPSIS
#include <curl/curl.h>

CURLcode curl_easy_getinfo(CURL *handle, CURLINFO_NUM_CONNECTS, long *nump);

DESCRIPTION
Pass a pointer to a long to receive how many new connections libcurl had to create to achieve the previous transfer (only the successful connects are counted). Combined with *CURLINFO_REDIRECT_COUNT(3)* you are able to know how many times libcurl successfully reused existing connection(s) or not. See the connection options of *curl_easy_setopt(3)* to see how libcurl tries to make persistent connections to save time.

PROTOCOLS
All

EXAMPLE
TODO

AVAILABILITY
Added in 7.12.3

RETURN VALUE
Returns CURLE_OK if the option is supported, and CURLE_UNKNOWN_OPTION if not.

SEE ALSO
curl_easy_getinfo(3), **curl_easy_setopt**(3),
